REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation.

(b) Warehouse withdrawls for consumption:

(1) Commodities withdrawn for bonded storage warehouses for consumption.

(2) For statistical purposes, ores and crude metals, such as copper, lead, and zinc, which were entered into bonded smelting and refining warehouse, are included when the finished products is withdrawn for consumption or for exportation. Commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are also included.

The statistics in this report, as well as in other reports on United States imports, covers shipments by rail, truck, air, parcel post, pipeline, etc., and all vessels including Army and Navy operated vessels. Reports FT 972, 973, 303 and other vessel shipping reports presenting import data exclude information on imports carried on Army-and-Navy-operated vessels (See Reports FT 972 and 973 for a more complete description.)

Shipments between the United States and its territories and possessions are not included in this report or in the vessel reports listed above but are presented separately in Report No. FT 800.

A complete discussion of the compilation procedures and coverage for import statistics will be found the the Foreword of the latest edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity description and country names are abbreviated in this report where space does not permit complete description. The omission of a commodity classification or country name from this report (except as indicated below) indicates no transactions for that commodity or country. See Schedule A, Statistical Classification of Imports into the United States, for complete commodity description and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available free upon request. To save printing costs in the monthly issues of this report (but not in the annual issues) imports of a commodity from countries where the imports are less than $10,000 are combined in a total identified as "Oth Cty" unless imports of a commodity are less than $10,000 for each country. If imports of a commodity are less than $10,000 for each country an asterisk is shown opposite the commodity total. Information on imports for each country included in the "Oth Cty" or commodity totals shown with an asterisk appearing in the monthly reports will be supplied on request. A charge may be made to cover the cost of preparing this detailed information.

Price: Annual subscription (including annual and monthly issues)..... $3.50
Monthly issues, each..... 0.35

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.).

A catalog of United States Foreign Trade Statistical Publications listing reports available on a free and paid basis is available free upon request to the Bureau of the Census.

Data in this report are available for reference purposes prior to the publication of the report. (Further information may be obtained from the Bureau of the Census.)

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation.

(b) Warehouse withdrawls for consumption:

(1) Commodities withdrawn for bonded storage warehouses for consumption.

(2) For statistical purposes, ores and crude metals, such as copper, lead, and zinc, which were entered into bonded smelting and refining warehouse, are included when the finished products is withdrawn for consumption or for exportation. Commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are also included.

The statistics in this report, as well as in other reports on United States imports, covers shipments by rail, truck, air, parcel post, pipeline, etc., and all vessels including Army and Navy operated vessels. Reports FT 972, 973, 303 and other vessel shipping reports presenting import data exclude information on imports carried on Army-and-Navy-operated vessels (See Reports FT 972 and 973 for a more complete description.)

Shipments between the United States and its territories and possessions are not included in this report or in the vessel reports listed above but are presented separately in Report No. FT 800.

A complete discussion of the compilation procedures and coverage for import statistics will be found the the Foreword of the latest edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity description and country names are abbreviated in this report where space does not permit complete description. The omission of a commodity classification or country name from this report (except as indicated below) indicates no transactions for that commodity or country. See Schedule A, Statistical Classification of Imports into the United States, for complete commodity description and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available free upon request. To save printing costs in the monthly issues of this report (but not in the annual issues) imports of a commodity from countries where the imports are less than $10,000 are combined in a total identified as "Oth Cty" unless imports of a commodity are less than $10,000 for each country. If imports of a commodity are less than $10,000 for each country an asterisk is shown opposite the commodity total. Information on imports for each country included in the "Oth Cty" or commodity totals shown with an asterisk appearing in the monthly reports will be supplied on request. A charge may be made to cover the cost of preparing this detailed information.

Price: Annual subscription (including annual and monthly issues)	$3.50
Monthly issues, each	0.35

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.).

A catalog of United States Foreign Trade Statistical Publications listing reports available on a free and paid basis is available free upon request to the Bureau of the Census.

Data in this report are available for reference purposes prior to the publication of the report. (Further information may be obtained from the Bureau of the Census.)

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation.

(b) Warehouse withdrawls for consumption:

(1) Commodities withdrawn for bonded storage warehouses for consumption.

(2) For statistical purposes, ores and crude metals, such as copper, lead, and zinc, which were entered into bonded smelting and refining warehouse, are included when the finished products is withdrawn for consumption or for exportation. Commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are also included.

The statistics in this report, as well as in other reports on United States imports, covers shipments by rail, truck, air, parcel post, pipeline, etc., and all vessels including Army and Navy operated vessels. Reports FT 972, 973, 303 and other vessel shipping reports presenting import data exclude information on imports carried on Army-and-Navy-operated vessels (See Reports FT 972 and 973 for a more complete description.)

Shipments between the United States and its territories and possessions are not included in this report or in the vessel reports listed above but are presented separately in Report No. FT 800.

A complete discussion of the compilation procedures and coverage for import statistics will be found the the Foreword of the latest edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity description and country names are abbreviated in this report where space does not permit complete description. The omission of a commodity classification or country name from this report (except as indicated below) indicates no transactions for that commodity or country. See Schedule A, Statistical Classification of Imports into the United States, for complete commodity description and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available free upon request. To save printing costs in the monthly issues of this report (but not in the annual issues) imports of a commodity from countries where the imports are less than $10,000 are combined in a total identified as "Oth Cty" unless imports of a commodity are less than $10,000 for each country. If imports of a commodity are less than $10,000 for each country an asterisk is shown opposite the commodity total. Information on imports for each country included in the "Oth Cty" or commodity totals shown with an asterisk appearing in the monthly reports will be supplied on request. A charge may be made to cover the cost of preparing this detailed information.

Price: Annual subscription (including annual and monthly issues)..... $3.50
Monthly issues, each..... 0.35

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.).

A catalog of United States Foreign Trade Statistical Publications listing reports available on a free and paid basis is available free upon request to the Bureau of the Census.

Data in this report are available for reference purposes prior to the publication of the report. (Further information may be obtained from the Bureau of the Census.)

In the calendar year 1951 issue of Report No. FT 110, the normal country arrangement was not followed in the case of countries shown under several commodities in commodity group 5 "Non-metallic Minerals" and under one commodity in group 6 "Metals and Manufactures, Except Machinery and Vehicles," (code 6302 300). In foreign trade reports presented in commodity by country arrangement, the countries are ordinarily shown under each commodity in the order of Schedule C, Code Classification of Countries. Countries are shown in Schedule C according to continent in sequence within each continent from north to south and west to east.

Users of figures on group 5 commodities and commodity 6302 300 in the calendar year issue of the FT 110 who are interested in a particular country or countries should look at all countries shown under the commodity since the country or countries in which they are interested may not be shown in the normal position.

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation.

(b) Warehouse withdrawls for consumption:

(1) Commodities withdrawn for bonded storage warehouses for consumption.

(2) For statistical purposes, ores and crude metals, such as copper, lead, and zinc, which were entered into bonded smelting and refining warehouse, are included when the finished products is withdrawn for consumption or for exportation. Commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are also included.

The statistics in this report, as well as in other reports on United States imports, covers shipments by rail, truck, air, parcel post, pipeline, etc., and all vessels including Army and Navy operated vessels. Reports FT 972, 973, 303 and other vessel shipping reports presenting import data exclude information on imports carried on Army-and-Navy-operated vessels (See Reports FT 972 and 973 for a more complete description.)

Shipments between the United States and its territories and possessions are not included in this report or in the vessel reports listed above but are presented separately in Report No. FT 800.

A complete discussion of the compilation procedures and coverage for import statistics will be found the the Foreword of the latest edition of Foreign Commerce and Navigation of the United States, Copies of the Foreword are obtainable upon request.

Commodity description and country names are abbreviated in this report where space does not permit complete description. The omission of a commodity classification or country name from this report (except as indicated below) indicates no transactions for that commodity or country. See Schedule A, Statistical Classification of Imports into the United States, for complete commodity description and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available free upon request. To save printing costs in the monthly issues of this report (but not in the annual issues) imports of a commodity from countries where the imports are less than $10,000 are combined in a total identified as "0th Cty" unless imports of a commodity are less than $10,000 for each country. If imports of a commodity are less than $10,000 for each country an asterisk is shown opposite the commodity total. Information on imports for each country included in the "0th Cty" or commodity totals shown with an asterisk appearing in the monthly reports will be supplied on request. A charge may be made to cover the cost of preparing this detailed information.

Price: Annual subscription (including annual and monthly issues)..... $3.50
Monthly issues, each..... 0.35

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.).

A catalog of United States Foreign Trade Statistical Publications listing reports available on a free and paid basis is available free upon request to the Bureau of the Census.

Data in this report are available for reference purposes prior to the publication of the report. (Further information may be obtained from the Bureau of the Census.)

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation.

(b) Warehouse withdrawls for consumption:

(1) Commodities withdrawn for bonded storage warehouses for consumption.

(2) For statistical purposes, ores and crude metals, such as copper, lead, and zinc, which were entered into bonded smelting and refining warehouse, are included when the finished products is withdrawn for consumption or for exportation. Commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are also included.

The statistics in this report, as well as in other reports on United States imports, covers shipments by rail, truck, air, parcel post, pipeline, etc., and all vessels including Army and Navy operated vessels. Reports FT 972, 973, 303 and other vessel shipping reports presenting import data exclude information on imports carried on Army-and-Navy-operated vessels (See Reports FT 972 and 973 for a more complete description.)

Shipments between the United States and its territories and possessions are not included in this report or in the vessel reports listed above but are presented separately in Report No. FT 800.

A complete discussion of the compilation procedures and coverage for import statistics will be found the the Foreword of the latest edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity description and country names are abbreviated in this report where space does not permit complete description. The omission of a commodity classification or country name from this report (except as indicated below) indicates no transactions for that commodity or country. See Schedule A, Statistical Classification of Imports into the United States, for complete commodity description and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available free upon request. To save printing costs in the monthly issues of this report (but not in the annual issues) imports of a commodity from countries where the imports are less than $10,000 are combined in a total identified as "0th Cty" unless imports of a commodity are less than $10,000 for each country. If imports of a commodity are less than $10,000 for each country an asterisk is shown opposite the commodity total. Information on imports for each country included in the "0th Cty" or commodity totals shown with an asterisk appearing in the monthly reports will be supplied on request. A charge may be made to cover the cost of preparing this detailed information.

Price: Annual subscription (including annual and monthly issues)..... $3.50
Monthly issues, each..... 0.35

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.).

A catalog of United States Foreign Trade Statistical Publications listing reports available on a free and paid basis is available free upon request to the Bureau of the Census.

Data in this report are available for reference purposes prior to the publication of the report. (Further information may be obtained from the Bureau of the Census.)

IMPORT STATISTICS

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation.

(b) Warehouse withdrawls for consumption:

(1) Commodities withdrawn for bonded storage warehouses for consumption.

(2) For statistical purposes, ores and crude metals, such as copper, lead, and zinc, which were entered into bonded smelting and refining warehouse, are included when the finished products is withdrawn for consumption or for exportation. Commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are also included.

The statistics in this report, as well as in other reports on United States imports, covers shipments by rail, truck, air, parcel post, pipeline, etc., and all vessels including Army and Navy operated vessels. Reports FT 972, 973, 303 and other vessel shipping reports presenting import data exclude information on imports carried on Army-and-Navy-operated vessels (See Reports FT 972 and 973 for a more complete description.)

Shipments between the United States and its territories and possessions are not included in this report or in the vessel reports listed above but are presented separately in Report No. FT 800.

A complete discussion of the compilation procedures and coverage for import statistics will be found the the Foreword of the latest edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity description and country names are abbreviated in this report where space does not permit complete description. The omission of a commodity classification or country name from this report (except as indicated below) indicates no transactions for that commodity or country. See Schedule A, Statistical Classification of Imports into the United States, for complete commodity description and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available free upon request. To save printing costs in the monthly issues of this report (but not in the annual issues) imports of a commodity from countries where the imports are less than $10,000 are combined in a total identified as "Oth Cty" unless imports of a commodity are less than $10,000 for each country. If imports of a commodity are less than $10,000 for each country an asterisk is shown opposite the commodity total. Information on imports for each country included in the "Oth Cty" or commodity totals shown with an asterisk appearing in the monthly reports will be supplied on request. A charge may be made to cover the cost of preparing this detailed information.

Price: Annual subscription (including annual and monthly issues)	$3.50
Monthly issues, each	0.35

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.).

A catalog of United States Foreign Trade Statistical Publications listing reports available on a free and paid basis is available free upon request to the Bureau of the Census.

Data in this report are available for reference purposes prior to the publication of the report. (Further information may be obtained from the Bureau of the Census.)

NEW REPRINT OF SCHEDULE A TO BE AVAILABLE SOON

A reprint of Schedule A including all corrections made to May 1, 1952, will be available shortly. This edition is a reprint of the August 1, 1950, edition incorporating all of the changes which have been made by supplementary bulletins since the 1950 edition was issued.

The new 1952 reprint includes the modified rates of duty and changes in classification necessary to reflect concessions neogtiated at Geneva, Switzerland, Annecy, France, and Torquay, England, under the General Agreement on Tariffs and Trade (GATT). The 1952 reprint of Schedule A will again be printed in loose-leaf form, and changes in the Schedule will be made by public bulletins and/or revised insert pages.

Copies of the new issue of Schedule A will be available about September 1, 1952. Subscriptions may be placed immediately with the Superintendent of Documents, Government Printing Office, Washington 25, D. C., U. S. Department of Commerce Field Offices, or Collectors of Customs. The price of the Schedule is $3 per copy to domestic subscribers and $4 per copy to foreign subscribers. These rates include the supplemental bulletins and insert pages for a period of at least 1 year. Checks and money orders should be made payable to the Superintendent of Documents. Coins and currency are sent at the sender's risk. Postage stamps, foreign money, or defaced or smooth coins are not acceptable. Remittance must be accompanied with the order.

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

Imports for consumption include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation.

(b) Warehouse withdrawls for consumption:

(1) Commodities withdrawn for bonded storage warehouses for consumption.

(2) For statistical purposes, ores and crude metals, such as copper, lead, and zinc, which were entered into bonded smelting and refining warehouse, are included when the finished products is withdrawn for consumption or for exportation. Commodities such as wheat and petroleum transferred from bonded storage warehouses to bonded manufacturing warehouses for further processing and subsequent withdrawal for exportation are also included.

The statistics in this report, as well as in other reports on United States imports, covers shipments by rail, truck, air, parcel post, pipeline, etc., and all vessels including Army and Navy operated vessels. Reports FT 972, 973, 303 and other vessel shipping reports presenting import data exclude information on imports carried on Army-and-Navy-operated vessels (See Reports FT 972 and 973 for a more complete description.)

Shipments between the United States and its territories and possessions are not included in this report or in the vessel reports listed above but are presented separately in Report No. FT 800.

A complete discussion of the compilation procedures and coverage for import statistics will be found the the Foreword of the latest edition of Foreign Commerce and Navigation of the United States. Copies of the Foreword are obtainable upon request.

Commodity description and country names are abbreviated in this report where space does not permit complete description. The omission of a commodity classification or country name from this report (except as indicated below) indicates no transactions for that commodity or country. See Schedule A, Statistical Classification of Imports into the United States, for complete commodity description and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available free upon request. To save printing costs in the monthly issues of this report (but not in the annual issues) imports of a commodity from countries where the imports are less than $10,000 are combined in a total identified as "Oth Cty" unless imports of a commodity are less than $10,000 for each country. If imports of a commodity are less than $10,000 for each country an asterisk is shown opposite the commodity total. Information on imports for each country included in the "Oth Cty" or commodity totals shown with an asterisk appearing in the monthly reports will be supplied on request. A charge may be made to cover the cost of preparing this detailed information.

Price:	Annual subscription (including annual and monthly issues)	$3.50
	Monthly issues, each	0.35

Subscriptions to these reports should be placed directly with the Department of Commerce Field Offices or with the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Regular subscribers to FT reports are automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.).

A catalog of United States Foreign Trade Statistical Publications listing reports available on a free and paid basis is available free upon request to the Bureau of the Census.

Data in this report are available for reference purposes prior to the publication of the report. (Further information may be obtained from the Bureau of the Census.)
